PRESENTING Dr Thornton Streeter

Director for the Centre for Biofield Sciences

RESEARCHING THE HUMAN ENERGY FIELD

World renown speaker and first time in New Zealand

Seminars

Auckland Friday 27th February 2009

Tauranga Tuesday 3rd March 2009

Wellington Friday 6th March 2009

**If you are looking for materials and technology to tangibly show your clients and others the changes and skill of your treatments as an energy medicine practitioner, this is the seminar for you.
DO NOT MISS THIS SPECIAL EVENT!!**

Dr Thornton Streeter has spent over fifteen years researching the Human Energy Field. He will be discussing the Human Biofield history and theory. Also he reviews other equipment; Kirlian Photography, GDV & Dr Hunt's system. This seminar will include in-depth discussions of the subtle anatomy and energy matrix comprising Energy Fields (Auras), Energy Centres (Chakras) & Energy Vessels (Meridians) in relation to the bio-energetic systems of the body.

Dr Streeter will also be introducing the latest technologies of Poly-contrast Interference Photography (PIP). PIP displays a live image on a PC monitor where the electrical signals from a video camera are graded into clearly visible colours representing a much finer gradation of light intensity than the image entering the camera. Light intensities are distinguished in a way that is impossible to the human eye.

Results of trials undertaken at CBS with BodyTalk with be presented also.

Before (left) After (right) Treatments

The PIP system and its components are not intended for the diagnosis, cure, mitigation or treatment of any disease nor any other medical condition, and is not intended to affect the structure or any biological function of the body. PIP is strictly an analysis tool that can be used to reveal patterns of non-visible light. This information can then be used in various ways depending on the training and experience of the investigator or practitioner. In-person training is highly encouraged for this technology.

Early bird special – register and receive a free CD - the benefits of adding PIP technology for your clients, your practice and your business. Register by 21st February 2008. Cost \$68

Seminar: three hours of the latest research, science and technology

Seminar Cost \$90

Early bird & free CD \$68 by 21st Feb

CD- How Healthwise is using PIP technology
